

Never again will you have to replace a controller just to add more stations.

Rain Bird® ESP Modular Controllers make time work to your advantage:

Easily upgrades from 4 to 13 stations with the addition of 3-station modules at installation or in the future

Installation is a snap with the roomy cabinet and horizontal terminal strips

Improves upon Rain Bird's already easy-to-use ESP style of programming

Reinforces Rain Bird's proven track record for quality, reliability and homeowner peace of mind

Take a few moments right now to review the Inside Story, then see your Rain Bird distributor for all the details about ESP Modular Controllers.

RBE-04-TE-01

ESP Modular Controllers.

Large LCD Screen

Bigger numbers and text messages make programming fast and easy

365-day Calendar

Includes leap year intelligence, provides accurate odd/even calendar day watering

Permanent-Day-Off

Allows the user to set any day of the week as a non-watering day in any program or schedule, making it easy to comply with watering restrictions or other requirements such as weekly lawn care or maintenance

3 Programs Feature

A slide switch makes for easy program selection and reduces programming errors

1 - Valve Test Terminal

Allows you to quickly match field wires with valves during installation

2 - Four Station Base Model

Capacity to receive plug-in modules of three stations each to allow expansion from 4 to 13 stations

3 - Hot-swappable Modules

Can be installed while controller is in operation and in any position.

4 - Dedicated Sensor Terminals

Allows the user to easily connect a sensor to the controller for maximum water efficiency

5 - Auxiliary Station™

Can be set to bypass an active sensor to allow watering even if other stations are disabled, or can operate as a normal station

6 - Large, Spacious Cabinet w/ Internal Junction Box

Affords easy access and quick wire-up

Contractor Default™ Program

Allows you to set up a program, save it to memory, then recall it without having to reprogram the clock zone by zone

Enhanced Diagnostic Feedback™

Alerts the user to programming errors and other conditions that may prevent an irrigation schedule from running

Sensor Bypass Switch

Allows the user to override an active sensor for maintenance or run a station or program manually

Additional Convenience Features

Lithium Battery

Maintains the time and date for up to 6 months during a power outage

Fuseless, Diagnostic Circuit Breaker

Identifies a station with valve or wiring problems, and continues to water operable stations

Non-volatile Memory

Maintains the irrigation schedule indefinitely during a power outage
